AMS/Art Materials Service

Call: 888-522-5526

www.artmaterialsservice.com

AMS Air-Powered Staplers are lightweight (0.6 kg) and durable. A special modification developed by AMS ensures that these staplers will not cut canvas or crush boards. Cartridges of staples are reloaded quickly within seconds. Each stapler is offered with or without a front spacer (nose plate), which turns it into a proper fitting tool.

The AMS Standard-Fire Flexi Tab Tool inserts one Flexi-Point or Rigitab per trigger press into wood mouldings in order to quickly clip the frame load into the frame. The nosepiece is designed to allow Flexi Point insertion horizontally. After firing, just slide the tool over to the next point of insertion for proper speed and efficiency. This tool is lightweight and can be loaded quickly without changing your work position.

Cassese

Call: + 33 164-4249-70

www.cassese.com

Cassese, inventor and leading manufacturer of the V-nail and V-nailer, is proud to introduce the new CS4008 UNI V-nailer. This memory under-pinner can join up to 3,360 corners per hour with two V-nail positions per corner. This new and exclusive model also features a retractable clamp system.

ITW AMP/Valiani-North America

Call: 847-821-2170

www.itwamp.com

The ITW AMP T300 Automatic saw has been developed to optimize productivity. Its specialized saw utility software allows for moulding length optimization of up to four cut sizes. Its production capabilities of up to 2,000 cuts per hour make it one of the best production saws in the industry.

The Valiani Plus®-iS computerized matboard cutting machine was developed and constructed for production framing businesses. Plus®-iS is available in two sizes and is compatible with all of the Valiani Interchangeable Heads, allowing it to cut from the front and the back. It can also cut materials just over 3/16" in thickness (5mm), single or multiple openings, V-grooves in all designs, pre-assembled double and triple mats, and French Matting by using the MatStylus® Drawing Head. Add all of these features to its 43" per second cutting speed and you have one of the most versatile computerized mat cutting machines in the industry.

Wizard International

Call: 425-609-5365

www.wizardint.com

Discover new software and hardware solutions for cutting and designing mats with Wizard™ International. Wizard will showcase three exciting products: the Wizard CMC 9000; Integrated Framer® Retail Management software with a new production management module; and Wizard's IF Visualization software.

Production Equipment Showcase

D&K Group
Call: 847-956-0160
www.dkgroup.net

D&K's Expression Gallery Wrap Laminator can turn any regular paper print or photograph into a professional-looking gallery wrap. Using the Gallery Wrap Laminator, simply apply a D&K canvas or brushstroke textured laminating film to the print. You may then wrap using standard wrapping techniques. The finished gallery wrap will appear as if it were produced on canvas with added protection and durability, including moisture and UV resistance.

Also introducing the Expression 27 Space Saver Laminator. This laminator takes up less than six sq. ft. of floor space and can mount and laminate printed artwork in less than three minutes. Simply insert a print into a laminating pouch board, process through the vertical pouch board entry, and then retrieve the finished product as it safely drops from the bottom of the machine. With a small footprint and easy operation, the Expression 27 Space Saver Laminator will save you time, space, and money.

Frameware Inc.
Call: 800-582-5608
www.framewareinc.com

The Saber SAM 400 patented, auto-feeding pneumatic machine from Frameware Inc. is for production framers installing saw tooth hangers. The machine provides more than 30% greater holding power in almost every frame material in which saw tooth hangers are used. The galvanized hangers are collated and packaged in strips of 25 making the loading process fast and efficient. Offered in boxes of 1,000.

Beale Ash Distribution
Call: 714-289-2130
www.bealeash.com

Introducing the new Epson Stylus Pro 7890 and Epson Stylus Pro 9890 printers. These two printers, part of the Epson Stylus Pro 890 series, incorporate Epson's latest achievements in photographic ink jet technology. By combining the precision of our MicroPiezo® TFP® print head with the proven performance of our eight-color Epson UltraChrome K3® with Vivid Magenta, our newest generation of Epson Stylus Pro printers continue to represent a level of technology unprecedented in Epson's history. Epson UltraChrome K3 with Vivid Magenta utilizes eight colors – including auto-switching Photo and Matte Black inks – while setting the standard for the industry. Our advanced Epson MicroPiezo TFP print head is capable of producing higher quality prints, at speeds almost twice as fast as our previous generation. And, with our latest ink-repelling coating and auto nozzle verification technologies, clogged nozzles are virtually eliminated. Epson has also developed a high performance, in-line spectrophotometer for commercial proofing applications.

Gunnar USA
Call: 360-657-5291
www.gunnar-usa.com

Introducing The Gunnar 4001, an ideal choice for volume production and one of the fastest machines in the world, with cutting speeds up to 80" per second. Designed for a demanding work environment, this machine is for those who work with many installations running continuously. With an increased work surface space of 49"x74", this innovative computer-

ized mat cutter can handle even the largest standard mat foamboards on alternate ends of the table. It also features a unique dual clamping system and is the only CMC to offer both a clamping system and a vacuum bed in one machine. Other features include two cutting heads for bevel and straight cuts; automatic blade depth adjustment for cutting V-Grooves or double mats without stopping; a "Cut-other-end" mode that allows two cutting fields to be operated alternately; and a secure vacuum table capable of holding wafer-thin materials.

Mounting & Laminating Supplies
Call: 877-909-5240
www.mlsupplies.com

Stretching canvas has never been so quick and easy. You can safely stretch giclees, canvas transfers, and oil paintings with The Tensador II canvas stretching machine. The Tensador II allows for stapling on the side and backs of stretcher bars. As an added bonus, it's unique clamping mechanism grips canvas without harmful piercing or over tension. Also showcasing the Quick-Bar, an exciting new system for gallery owners and giclee printers that allows for quick stretching and finishing of digital art on canvas. Quick-Bar requires minimal tools to effectively tension even the largest digital canvas images.
